Education

University of Toronto

Sep. 2021 – Apr. 2026

Bachelor of Applied Science and Engineering

Toronto, ON

- Program: Mechanical Engineering + PEY Co-op, Minor: Engineering Business, Certificate: EV Design
- Related Coursework: Mechanical Engineering Design, Kinematics and Dynamics of Machines, Electric Vehicle Design, Analog and Digital Electronics, Design for the Environment

Technical Skills and Qualifications

Software & Tools: SolidWorks (CSWA Certified), AutoCAD, Onshape, Microsoft Office Suite (Excel, Word, Powerpoint)

Engineering & Design: GD&T, DFM/DFA, Tolerance Analysis, BOM Development, FEA, Reverse Engineering, Iterative Design, Prototyping, Engineering Drawings

Fabrication & Programming: Manual Machining (lathe, mill, drill press), Benchtop CNC, 3D Printing, PCB Design, Python, MATLAB

Professional Experience

Mechanical Engineering Intern (Special Projects)

May 2024 – Aug. 2025

AGS Automotive Systems

Oshawa, ON

- Modelled 20+ bracket, fixture, and process assemblies in SolidWorks with GD&T-compliant drawings, supporting active production programs across the plant
- Applied the MOST (Maynard Operation Sequence Technique) method to benchmark cycle times on key workflows, identifying changes that cut process time by 15%
- Audited 50+ steel bundles per week against internal specifications, flagging dimensional and surface defects before downstream processing
- Built Excel tracking models to visualize process metrics and present recommendations to engineering leads, turning time-study data into actionable layout and tooling changes

Design Engineering Intern

May 2023 – Aug. 2023

Parts Apart

Toronto, ON

- Designed a coffee mug with a convertible handle (top-mounted for stacking, side-mounted for drinking) end-to-end as the sole design engineer on a two-person team, working directly with the founder across discovery, CAD, prototyping, and user testing
- Modelled the product in SolidWorks and iterated across multiple prototype rounds, applying DFM/DFA principles to resolve manufacturability trade-offs between form, cost, and assembly

Projects

Low-Speed PMSG for Vertical Axis Wind Turbine

Sep. 2025 – Apr. 2026

Capstone Design (MIE490/491), Client: UTWind

University of Toronto

- Designed a custom direct-drive outer-rotor radial-flux permanent magnet synchronous generator for UTWind's 2026 vertical axis wind turbine, targeting 600 to 1200 W output at 100 to 200 RPM with under 0.1 Nm starting torque
- Collaborated with teammates to optimize rotor and stator geometry based on electromagnetic simulation data, successfully hitting 842 W output and 0.09 Nm peak starting torque
- Delivered a fabrication-ready SolidWorks assembly with procurement specs for NdFe35 magnets and ASTM A677 (M19) lamination steel, setting up the 2026 turbine build

All-Wheel-Drive Demonstration Platform

Sep. 2025 – Dec. 2025

Electric Vehicle Design (APS380)

University of Toronto

- Designed and built a scaled dual-motor split-axle AWD platform in SolidWorks to demonstrate EV drivetrain architecture, torque split, and traction behavior
- Iterated on belt and pulley geometry and shaft alignment across multiple SolidWorks revisions to resolve fit issues and improve drivetrain robustness

Awards & Certifications

Dean's Honours List, Certified SolidWorks Associate (CSWA), Basic Machining Certification (George Brown College), University of Toronto Skule Frosh Leader
