

Mohid Tahir

Mechanical Engineer

☎ +1 (647) 778-8676 ✉ mohidt@outlook.com 🌐 mohidtahir.ca 🔗 linkedin.com/in/mohid-tahir

Education

University of Toronto

Sep. 2021 – Apr. 2026

Bachelor of Applied Science and Engineering

Toronto, ON

- Program: Mechanical Engineering + PEY Co-op, Minor: Engineering Business, Certificate: EV Design
- Related Coursework: Mechanical Engineering Design, Kinematics and Dynamics of Machines, Electric Vehicle Design, Analog and Digital Electronics, Design for the Environment

Technical Skills and Qualifications

Project Management: Scope Definition, Project Planning, Timeline Tracking, Stage-Gate Product Launch, Risk Management, Budget and Cost Modelling, Stakeholder Management, Client Communication, Requirements Gathering

Methodologies: Agile, Six Sigma DMAIC, Lean, Iterative Design, Weighted Decision Matrices, Life Cycle Assessment (LCA), NPV Modelling

Software & Tools: Microsoft Office Suite (Excel, Word, PowerPoint), Microsoft Project (foundational), SolidWorks, AutoCAD, Python, MATLAB

Professional Experience

Mechanical Engineering Intern (Special Projects)

May 2024 – Aug. 2025

AGS Automotive Systems

Oshawa, ON

- Modelled 20+ bracket, fixture, and process assemblies in SolidWorks with GD&T-compliant drawings, supporting active production programs across the plant
- Applied the MOST (Maynard Operation Sequence Technique) method to benchmark cycle times on key workflows, identifying changes that cut process time by 15%

Design Engineering Intern

May 2023 – Aug. 2023

Parts Apart

Toronto, ON

- Designed a coffee mug with a convertible handle (top-mounted for stacking, side-mounted for drinking) end-to-end as the sole design engineer on a two-person team, working directly with the founder across discovery, CAD, prototyping, and user testing
- Scoped a target user segment affecting roughly 40% of the population through customer interviews and secondary research, sharpening product positioning before CAD work

Communications Manager & Project Team Member

Jan. 2022 – Apr. 2022

Engineering Strategies and Practice II (APS112) - University of Toronto

Toronto, ON

- Served as the single point of contact between a faculty client and a 5-person design team building a teaching device for the course: Six Sigma for Engineers (DMAIC)
- Shortened feedback to revision cycles by roughly 20% through structured weekly touchpoints and a shared requirements log, translating client input into engineering action items

Projects

Low-Speed PMSG for Vertical Axis Wind Turbine

Sep. 2025 – Apr. 2026

Capstone Design (MIE490/491), Client: UTWind

University of Toronto

- Managed a year-long capstone design project for UTWind, delivering a custom permanent magnet generator from architecture selection through validated simulation to fabrication-ready handoff with procurement specifications
- Screened four competing generator architectures using a weighted decision matrix, aligning technical trade-offs with client performance requirements before committing design resources

Google Home Housing

Jan. 2024 – Apr. 2024

Design for the Environment (MIE315)

University of Toronto

- Ran a materials trade study comparing plastic and FSC-certified wood for Google Home speaker housings, using hybrid Life Cycle Assessment and 5-year Net Present Value as the decision basis
- Packaged the analysis into a consulting-style recommendation covering cost, environmental impact, brand perception, and end-of-life disposal

Awards & Certifications

Dean's Honours List, Certified SolidWorks Associate (CSWA), Basic Machining Certification (George Brown College), University of Toronto Skule Frosh Leader
